

VOL. XLV No 1

MACDONALD COLLEGE, QUEBEC

SEPTEMBER 18, 1970

# McGILL PLAYS AT Financial Chess

Task Force Recommends Major Cuts in Expenditures

Tuesday the McGill Task Force gave its proposals on cutting the financial operating costs of the university. The following is an exact copy of the press release.

A committee appointed by former Principal H. Locke Robertson to review McGill's financial situation has submitted its report to the new Principal, Dr. R. E. Bell. It sets the University new goals of efficiency in order to preserve and promote academic excellence. Dr. Bell commented on its main proposals at a Press Conference held today after he had addressed the University's academic staff.

When the 1970-71 Government grant to McGill was announced last May, he said, it fell several million dollars short of the University's reasonable expectation. Dr. Robertson had warned over many years that continued lack of adequate Government support would deplete the University's resources, both financial and academic, to the point of exhaustion. When it emerged that the 1970-71 grant would instead of correcting that situation create a further very large deficit on the University's operating budget, Dr. Robertson appointed the Vice-Principals Academic, Administration and Professional Affairs, and the Directors of Finance, of University Planning and of a Planning Research, to constitute a summer-time task-force, to review the University's total financial situation, and to make recommendations for the 1971-72 budget.

Dr. Bell said the Task Force had now reported that the deficit on last year's operations was more than \$2 million, that in view of the Government grant this year's deficit would be nearly \$6 million and that rising costs and depleted income would, given the present pattern of operations, increase the annual deficit to a probable \$8 million in 1971-72, and at least \$10 million in 1972-73. Losses of this magnitude, the Task Force pointed out, would speedily cripple the University, particularly since 85% of its endowment is restricted by the donors to special uses, such as student bursaries or the support of research, and therefore cannot be used to meet operating deficits. Also, the University was by Government policy not in a posi-

tion to raise student fees even if that had been desirable, and it was unrealistic to hope that sufficient additional financial support for current operations could be raised from graduates and friends, invaluable as that source of income would continue to be. The only recourse left, the Task Force had reported, was a truly significant reduction in expenditure.

Dr. Bell discussed the Task Force report last week at a special three-day Dean's Meeting. He said that while the Task Force report was still only at proposal stage, nevertheless its main conclusions were generally endorsed for submission to the Senate and Board of Governors. It would now be his responsibility to prepare for them a set of recommendations designed to bring the 1971-72 deficit down to more tolerable proportions. The Board had already authorized a University Long-range Planning Committee which would take a longer-term view of the reconstruction of the total McGill operation. It would aim at bringing the operating budget into line with the resources likely to be available to the University in the decade of the seventies. The Long-range Committee would be asked to get to work at once. 'We must cut back on non-essentials' declared Dr. Bell, 'in order to improve that academic excellence of those operations which we must at all costs maintain.'

No area of the University's activity was omitted from the Task Force review. Among the possibilities placed before Dr. Bell and discussed by him with the Deans were many which starkly indicated the seriousness of the University's financial situation. The Task Force has recommended that plans for further student residences should be abandoned; at least one of the present residences (now owing to changes in student populations only partially filled) should be converted to academic use, and a number of uneconomic auxiliary buildings closed; the University Museums should be shut down; the University should save \$200,000 each year by suspending Inter-Collegiate Sports - Intramural sports would be encouraged; other Administration and Non-academic budgets should be cut over \$1 million, for a total in this area of \$2.1 million, while the Academic budgets (by far the largest item in the University's accounts)

should be reduced by \$1.4 million. The most controversial proposal in the report is one to bring the Faculty of Agriculture to the Montreal campus, for an estimated annual saving of well over \$1 million.

'The fields and research facilities at Ste. Anne de Bellevue would remain' said Dr. Bell, 'but the proposal is that the Faculty should be in part redistributed among existing parallel departments on the McGill campus in order to avoid costly reduplication of programs, and in part should continue as a more specialized Faculty of Agriculture and Environmental Sciences, housed in one of the buildings on the Montreal campus. The Task Force believes that there could be considerable academic gains as well as substantial financial savings in this consolidation of the University's operations on the one campus, and the freeing of the Macdonald campus for other educational purposes as McGill's contribution to the reshaping of English language higher education in Quebec, in which we believe all the present institutions should co-operate'.

'The period of reconstruction' Dr. Bell acknowledged, 'will inevitably bring to an end some cherished traditions, but we can emerge a more efficient, and a more effective university and maintain in the new patterns as fine a reputation in matters academic as McGill ever attained in the old.'

'The institution which is inflexible is dead' said the new Principal, 'the institution which can recognize the time of change and adapt to it, is the institution which is alive, and in all its 150 years of history McGill was never so alive as she is today'.

Ed Note: These proposals are to be presented to the Senate next week and following approval will go to the Board of Governors on September 28, 1970. As yet there is no assurance from the provincial government that grants will not be cut in accordance with the University's cut backs.

In response to a question from Steve Casselman, CBC Agricultural and Resources Department Farm Commentator on campus, regarding when these proposals would be implemented, Vice-Principal Oliver replied that they must be in effect by the '71-'72 academic year.

## In Memoriam

Dr. Eric O. Callen, of Baie d'Urfé, died suddenly of a heart attack August 22. He was working with an archeological expedition at Ayacucho, in the Andes Mountain in Peru, on his research specialty, the plants used for food by American Indians before the arrival of Europeans.

Dr. Callen developed methods of analyzing mummified remains found in caves high in the mountains of Mexico and South America.

His results have greatly extended modern knowledge of prehistoric diets in the Americas, of the use and domestication of wild plants by primitive peoples, and of the beginnings of Agriculture. He was recognized as a world authority in his field of Ethnobotany.

Dr. Callen was an Associate Professor in the Department of Plant Pathology at Macdonald College. He taught many courses in botanical subjects since his appointment to the staff in 1947, and also did research on plant taxonomy.

He was Chief Examiner in Biology (Protestant Schools) in the Department of Education, Province of Quebec. His interest in students was even deeper than his interest in science, and he was constantly involved in student activities at their request.

A Scot and proud of it, Dr. Callen was born in 1912. He was educated at George Heriot's School in Edinburgh. He

received the B.Sc. (Honors) degree in 1936, and the Ph.D. in 1939, both from the University of Edinburgh. He was a silver medalist in languages at school. This ability was put to use during the second world war, when he worked in the intelligence service.

He was elected a Fellow of the Botanical Society of Edinburgh, and a Fellow of the Linnaean Society of London; he held memberships in numerous scientific societies. He contributed many articles to scientific journals and books, and was invited to participate in international congresses in the United States and in South America.

He is survived by his wife Leila Anne, and by two sons, Lieutenant Thomas Robert, of the Canadian United Nations force in Cyprus, and Robert Gordon, attending Marianapolis.

The staff and students of Macdonald College will miss Dr. Callen, and we extend our sympathies to his family.

AND SO IT CONTINUES

## Students Meet to Discuss

Soon after the startling McGill Task Force Press Release became known, the Student Council held a well attended meeting to inform students of the happenings.

After a brief recapitulation of the facts concerning McGill's financial position and its direct relation to the Macdonald Campus, the floor was opened for discussion. Among the suggestions best received were the concrete proposals put forward by a group of postgraduates who, it seems, will be the ones to suffer greatest if the proposed Macdonald to McGill move is passed by the Senate and the Board of Governors.

Many times it was stressed that we as students must be well-informed if we are to act intelligently and effectively. Dick Whittaker, a postgrad active in student affairs over the past years, proposed that the CEGEP committee formed last spring be reconstituted immediately and add to its terms of reference to present the opinions and demands of the students. Also, it was the general consensus that members of Faculty who have or will devote their life's work to Agriculture should become the leaders, and students who have

relatively less to risk should respect and back the decisions of these people. Only a united group will weather the storm with the least wreckage.

Should it become inevitable that Agriculture, for economic and educational reasons, agrees with the proposed move then, as suggested, staff and students must aim to establish Agriculture on the McGill campus with the best possible physical facilities and the highest possible educational standards.

### Students Society Meeting

Time: 12:45 p.m. Monday September 21

Place: Centennial Center Ballroom

Purpose: 1) At this meeting nominations will be accepted for three members-at-large. All members of the Students Society are eligible for nomination.

2) The Committee to present student views to administration will give an interim report on present events regarding the relocation of the Macdonald Campus.

# Editorial

## Faculty's Move

Macdonald College is going to be moved to McGill. This appears to be a hard, cold fact that we have to face. I personally believe that this is true. Last year when the future of Macdonald College was in jeopardy we were fighting a government on a semantic point — standing up for our rights as a college and an English institution. At this we had a chance to win and maintain our place. We did that, or thought we did, and looked forward to an existence in co-operation with the new provincial government.

As you can see from the press release on page one money is now the undeniable question. We are up against a brick wall. McGill has to cut back to remain a viable institution. Macdonald is small and spending too much for its size. It is a difficult fact to swallow but a fact nevertheless.

There were several points brought up at the Students' Society meeting on Thursday night that were well founded. It was pointed out that the staff occupies a much more permanent position within the college and their careers here extend beyond the five years we spend here. If they are in favour of this move, the book is closed. We move. What remains is to make certain that we achieve the most favourable position possible on the McGill campus. Bargaining should begin now.

S. B.

## Costs and Govt. Grants to Quebec Universities

UNIVERSITY	NUMBER OF FULL-TIME STUDENTS	EXPENDITURE (1) PER STUDENT	GRANT PER STUDENT

Quebec	8,381	3,516	2,926

(1) Excluding Research and Ancillary Enterprises.

## Letters

### Residence Discontent

Sir,

I am becoming increasingly concerned about the living conditions in Stewart Hall. I believe that many students were misled over the kitchen facilities — the letter sent to potential residence students dated April 15th and signed by Mr. Shipley, the secretary, states, "Room with adjoining bathroom (shared) — and /or kitchenette facilities (shared) \$50 additional i.e. \$375 per session." Many students came in good faith prepared to pay the extra \$50 for what they understood would be a kitchenette shared among at the most, 4 people. As it now stands there are eight students who for their \$50 each have received a key to the kitchenette on 2nd floor. This kitchenette has 1 stove (with 3 out of the 4 burners working), one refrigerator (allowing 1/2 shelf to each girl), a single sink (measuring 9" x 12"), and only enough floor and counter space for two girls to work comfortably. This is not the first incident in which students feel that they were not adequately informed — what ever happened to Mr. Morin and the Telephone Committee? Is it any wonder that there are only 91 students in Stewart Hall?

Chris Brick  
B. Ed. (H. Ec.) '71

### Open Letter to the Students

The purpose of this letter is to pass on some information regarding the Centennial Centre which is your Student Union.

Located in the basement, next to the Bar-Disco en-

trance, is the Games Room. The charge for pool and shuffle-board is 50 cents per hour. There is an additional charge of 50 cents for pool cues returned with tips removed. There is a time limit of one hour per group at the pool tables. Ping-pong paddles are available, along with pool and shuffle-board equipment at the Centennial Centre desk. Ping-pong balls are sold at a cost of 25 cents each.

The main function of the cafeteria is to provide meals and snacks to the students and staff at the college. There is the library in the Main Building to use for studies and the lounge for playing games. Breakfast, dinner and supper, can be obtained at the cafeteria at very reasonable prices. The main meal of the day is only 90 cents and includes soup, main dish, desert and beverage. Prices for other items are posted in the cafe-

teria. For commuters and those students buying their meals by the day they may find this a cheap and practical means of obtaining their meals.

On the main floor there is a lounge area with color television. This area is for relaxation and is not to be used as a dining area. Food and drink are not to be taken into the lounge. Chess games, monopoly, cribbage and checkers are available at the Centennial Centre desk at no charge. These games are not to be played in the cafeteria at meal times.

The Centennial Centre is the student's building. Use it wisely and enjoy its facilities.

Gary Selig,  
Chairman  
C.C.C.

# SPORTS

## Green but Keen

There is a new look in football at Macdonald College this year. With only three returnees from last year's squad, the 1970 Clansmen will be largely dependent on efforts by this year's rookies.

However, leading the team is a very capable and experienced coaching staff. Ray Mader is head coach and is no stranger to Macdonald. He was assistant coach here from 1965 to 67 before he went to Bishop's where he was a league all-star. Coach Mader has always promoted toughness and enthusiasm in his teams and should receive 100% from all rookies, if the early practices are any indication.

Dave Norcott and Bruce Barnes are assistant coaches, with Coach Norcott handling the defense unit and Coach Barnes the offensive squad. The former was an outstanding defensive halfback at Macdonald for two years, and also with the McGill Redmen. Coach Barnes is a "real student

PHOTO BY AL STEWART

"Start the Hitting Early", encourages Coach Mader. This team is eager to play and learns quickly.

of the game" having played two years with the NDG Maple Leafs and helped coach them to the Canadian championships in 1965.

He is familiar with the league as well, coaching at SGWU last year.

Returning from last year's team and being heavily relied on to lead the rookies are John Klinck, Bob Thompson, and Bill Bolhuis. Who's the quarterback this year? Once again a Macdonald High alumnus has turned up for the job. Ian Kirkpatrick, though diminutive, will be leading the Green and Gold offence; other newcomers to watch are basketball convert Dell Hiscock, a senior from New Brunswick, and Bob Bonenburg, a second year Diploma student.

With these players as a nucleus, the Clansmen go into competition this weekend in an exhibition encounter with Université de Sherbrooke. The first home game will be on October 3rd, so save that day to support your football team in the Macdonald College tradition.

## Lassies

If you like women's sports, then you are probably wondering about Mac sports and just what there is and how you can become an active member. All women's athletics is under the able direction of the Women's Athletic Association (W.A.A.) made up of representatives from respective classes, coaches and executive.

The sports schedule is presently being arranged and will be posted as soon as possible. Check this column for it in one of the upcoming issues of the Dram.

Stewart gym and swimming pool will be open for anyone wishing to get in some "preseason conditioning". Don't be shy. You'll

probably find you won't be the only one there.

The teams are picked on strictly a "skill and ability" basis. Managers are also in demand for those interested. This is a chance to display some of your organizational and administrative talents. All inquiries should be directed to Miss Sharon McCaffery, Room 335, Stewart Hall.

Mac teams have held fairly impressive records and good reputations wherever they've gone. They have shown themselves to be quite capable against strong competition by our much larger university counterparts. Let's continue to do so by coming out and contributing our talents.

Keep reading this section for further information on Women's Sports and feel free to contact the W.A.A. at any time.

## Wildlife at Mac

A select group of highly colourful wildlife films will be a new feature of the scene on the Macdonald College Campus. The film series to which both the public and the student body are cordially invited will be narrated by naturalist-photographers on lecture for the National Audubon Society, as part of a continent-wide undertaking. The series provides students of natural science, photographers and outdoor enthusiasts with a very special means of indulging their interest. Those who wish to further their appreciation of the intricacies which lie behind the environmental crisis of our time should seriously consider participating.

On Thursday, September 24th, the series will begin when Robert Fultz brings to the Macdonald campus "Acadian Reflections" a thoughtful film about the East coast region. Two films on Australian Wildlife by Harold J. Pollock and Eben McMillan will provide valuable insights into this Commonwealth country with its fascinating geography, climate and truly unique animal life. In the new year, Bristol Foster will

take his audience on an arm chair safari, "Down South-up the Nile". This film, while part of the total presentation of Audubon Films in the Montreal area for the 1970-71 season, will be presented only at McGill University, but will be available to those of the Macdonald College audience who wish to participate in this family adventure. On March 26th, 1971, Edgar T. Jones will round out the series with his beautiful film, "Canada's Mountain Wilderness".

The Morgan Arboretum Association has joined with the Redpath Museum of McGill University to make it possible to provide this series to residents of Macdonald and the Greater Lakeshore area. Season tickets and information may be obtained from the Centennial Center, Macdonald College.

### Mind Expression

Sir,

I would like to thank all members of the student body who in any way contributed to the Freshman Orientation Program. It is this sort of group effort which will prove invaluable to the student body as a unit in the future.

Brian Nussey  
Internal V.P.  
Student's Council

Sir,

As you are no doubt aware the diversity of course offerings on this campus is extremely limited. If you find this situation disappointing and would be interested in participating in a series of informal evening seminar/discussion sessions, led by McGill experts, on aspects of sociology, anthropology, political science, or any other field, contact Dave Ladd or myself, or leave your name and address at the Centennial Centre desk (with any suggestions for discussion topics).

It is important that anyone who is interested should make themselves known as any request for financial assistance in this project, to whatever source it may be directed, would be greatly aided by a large number of prospective participants.

# BAR-DISCO

A long awaited dream has finally come to reality on the Macdonald campus — the Bar-Discotheque (located in the basement of the Centennial Centre).

Only previously talked about as a vague and elusive possibility, the Bar-Disco began only last year, when a group of very keen students spent a considerable amount of time, effort and enthusiasm in making a comprehensive study on the various aspects involved in constructing such a night spot. After presenting its report to last year's Student's Council and after a certain amount of heated discussion had taken place, Council committed itself to spending up to \$20,000 on its construction.

Unfortunately with second term there also came the uncertainty of the future of Macdonald College. Understandably Student's Council stalled in the construction of a potential "white elephant". The future looked very bleak, until a general provincial election appeared imminent and Jean Guy Cardinal, former Minister of Education, informed McGill that the West Island CEGEP would not be located at Macdonald. In retrospect this gave us a false sense of security and the future seemed hopeful, at least it seemed we were being given a chance to prove our ability to develop the Faculty of Agriculture and Environmental Science.

Last March the future looked much more promising. Council gave the green light and the Bar-Disco was revived and the money was removed from the reserve funds. Council also handed over to its Centennial Centre Committee the responsibility of building and operating the Bar-Disco. In early April C.C.C. appointed a post graduate student as general contractor and formed an operations committee to draw up a plan ready to go into effect September. The actual construction of the Bar-Disco took place over the summer months under

the jurisdiction of the general contractor.

After many problems had been overcome, the Bar-Disco was opened Thursday, September 10 and the Operational Committee took over.

So much for the past, now for the present. The Bar-Disco is open to all members of the Macdonald Community; students, academic and non-academic staff, alumnus, and former Mac students as well as their families. Everyone has to obtain a membership card for \$1.00 (which is valid for one year) except for those who have no connection with Macdonald College. These people may only enter if accompanied by a Mac student who must then sign for his guest and assume responsibility. The en-

doubt the Bar employees will be perfectly within their rights to check McGill ID's. Student money was used to build the Bar and a few under age students will not be permitted to jeopardize our chances of obtaining liquor licences from the QLB. Alcoholic drinks will NOT be permitted into the Disco area.

For all, the Disco provides a discotheque setting with a three thousand dollar sound system and the latest recordings spun by the D.J. to ensure continuous non-stop music for those who wish to dance. The Disco is open from 8:00-12:00 Monday, Tuesday, and Wednesday and from 8:00-2:00 a.m. Thursday and Saturday and from 4:30-2:00 a.m. Friday. These hours are completely flexible and if there is little demand for a particular night, that night will be discontinued. The Bar-Disco has to pay for itself.

The Bar-Disco was built entirely for the benefit of the Macdonald

PHOTO BY AL STEWART

And then she said to him, "Turn over a new leaf."

trance fee for these guests is \$0.25 and only one guest per Mac student is permitted.

Those able to enter the Bar will find a completely equipped bar capable of serving a wide range of alcoholic drinks at very reasonable prices and a pleasant atmosphere. The bar is staffed entirely by students and is under the supervision of the Operational Committee. There is no tipping. Only those twenty and over may be permitted into the bar as Quebec Liquor laws are being strictly enforced. In case of

Community, particularly the students, and it is up to you students to make the most of it. Also remember that damage costs will come out of student money and may force the Bar-Disco to curtail its operations. Before you act, think!

Remember!!

1. Only those twenty or over may enter the Bar.
2. No alcoholic beverages may be removed from the Bar area.

Keep our Bar-Disco respectable and it will be a great source of enjoyment for what appears to be the Faculty of Agriculture's last year on the Macdonald Campus.
